

## **Street-MAX Street Release Bearings**

### **Maximum Stroke Measurements**

<b>Master Cylinder Diameter</b>	<b>Pedal Length</b>	<b>Pedal Freeplay</b>	<b>Chevy / Chrysler Stroke</b>	<b>Ford Stroke</b>
5/8"	11"	1"	0.28"	0.28"
3/4"	11"	7/8"	0.45"	0.44"
7/8"	8.5"	3/4"	0.60"	0.60"
1.0"	11"	7/8"	0.78"	0.78"
Minimum Set-up Height			1.70"	1.85"

#### **Notes:**

All master cylinders used approximately 1.0" to 1-1/6" stroke.

All pedal assemblies were adjusted for minimum safe pedal freeplay (to ensure max. piston stroke).

All tests were conducted with 15 pound load at maximum height.

1.0" is the maximum master cylinder size recommended for use with HydraMax Release Bearing Assemblies.

Pedal length will not affect max. stroke numbers. However pedal freeplay & pedal effort will differ.

Wilwood Master Cylinders were used for all tests.
